Jagenberg Converting Solutions at the Battery Show Europe 2026 Precision Technology that Moves the Energy Market

Stuttgart, June 9-11, 2026 - Hall 1, Stand 1C55

Jagenberg Converting Solutions GmbH (JCS) presents itself at Battery Show Europe 2026, Europe's leading trade fair for battery and e-mobility technologies. Under the motto "Create.Future.Together." JCS showcases its combined expertise for sophisticated roll-to-roll processes in battery production at the Stuttgart exhibition center.

The focus is on customized complete solutions for processing anode and cathode materials. Under the motto "Plug and Produce," the Tandem Coating & Drying Lines form the core. This includes a seamless process chain of slurry supply, coater, drying system as well as drives and controls, complemented by the company's own slot die technology. Added to this is high-precision equipment for calendering, slitting and winding: servo-hydraulic gap adjustment of <2 µm, crossweb coating at less than 1% variation and up to 30% scrap reduction. The concepts are flexibly scalable from pilot scale to large-scale production - from pilot to giga.

"Jagenberg Converting Solutions masters battery production down to the detail - and we are now deliberately transferring exactly this precision to further future markets. Pharma, hydrogen, and membrane applications follow the same principles: traceability, reliability, and single-source accountability. For us, the Battery Show is the ideal place to demonstrate this ambition."

Prof. Dr.-Ing. Daniel Eggerath, Managing Director of Jagenberg Converting Solutions GmbH

Presentation on the Innovation Stage

Dr.-Ing. Martin Gotterbarm (Key Account Management) will speak live on the Innovation Stage on June 10 at 10:55 a.m. His topic "Thriving OEE Excellence in Electrode Coating" details how an overall equipment effectiveness (OEE) of more than 95% has been achieved in electrode coating after record time.

JCS invites all interested parties to meet the team in person at Stand 1C55 in Hall 1. A free ticket can be reserved with the code VDMA20.

About Jagenberg Converting Solutions

Jagenberg Converting Solutions GmbH develops and manufactures turnkey complete systems for sophisticated roll-to-roll coating and converting processes - for battery, pharma, hydrogen and membrane applications. JCS is part of the Jagenberg Group.
